REVIEW OF PERFORMANCE

The principal activities of the Group are:

- (i) production and sale of beverages (includes soft drinks, beer and stout) and dairy products; and
- (ii) printing and publishing.

These activities are carried out through the Company's subsidiary, joint venture and associated companies to which the Company provides management and administrative services.

On 27 August 2013, the Directors announced the proposed demerger of its property business by effecting a distribution *in specie* (the "FCL Distribution") of all the ordinary shares in the issued share capital of Frasers Centrepoint Limited ("FCL"), a wholly owned subsidiary of the Company to shareholders of the Company, on the basis of two ordinary shares in FCL for each ordinary share of the Company and the listing of the FCL shares on the Main Board of the Singapore Exchange Securities Trading Limited ("SGX-ST") by way of an introduction.

On 13 November 2013, the shareholders of the Company approved the FCL Distribution. Prior to the quarter ended 31 December 2013, the Company subscribed for 1,806,520,790 new shares in FCL for a total subscription amount of \$670 million. Subsequently, the Company announced the completion of the FCL Distribution on 8 January 2014.

In accordance with FRS 105, Non-current Assets Held for Sale and Discontinued Operations, the results of FCL Group has been presented separately on the Group Profit Statement as Discontinued Operations. Accordingly, the Group's Properties Segment has been discontinued and the remaining undisposed Property components will be presented in the Others segment.

Profit Statement – Financial Year Ended 30 September 2014

Group revenue increased 6% to \$2,421 million for the year ended 30 September 2014 compared to last year. Beverages recorded an increase on the back of Breweries' increased sales volume while Dairies recorded higher revenue contribution from its operations in Singapore, Malaysia and Thailand. Printing and Publishing revenue was marginally lower at \$352 million.

Group PBIT (profit before interest and tax) of \$277 million was 29% higher than last year due to higher contribution from Soft Drinks and Breweries.

Group attributable profit on continuing operations* and basic earnings per share on continuing operations was flat at \$144 million and 10.0 cents respectively.

* before fair value adjustment of investment properties and exceptional items

Beverages

Overall Beverages revenue and PBIT was 9% and 42% higher compared to last year.

Soft Drinks revenue increased by 2% as compared to last year. Modest increase in Malaysia's revenue is mainly due to higher volume of most key brands and increased distribution outlet coverage partly offset by intense competition. PBIT increased by 31% to \$67 million on the back of favourable sales mix, lower commodity costs and lower operating expenses.

Breweries revenue and sales volume were 28% and 34% higher than last year. Sales volume grew across most brands while sales revenue increased on the back of volume increases and favourable sales mix but offset partly by exchange movement. Breweries' PBIT increased by 51% mainly due to higher sales volume, favourable sales mix and non-recurrence of one-off impairment of equipment last year. The increase was partly off-set by higher spending on promotional activities and increased overheads resulting from expansion of its operations.

Dairies

Dairies revenue was 6% higher than last year.

Double digit growth in volume in both domestic and export markets contributed to Dairies Thailand's revenue increase of 12%. The strong performance is backed by strong distributor performance and effective advertising and promotional activities. Dairies Malaysia's revenue increased 4% with better sales performance and effective trade discount management partly offset by unfavourable exchange rate. Dairies Singapore recorded an increase of 3% in sales revenue due to improved sales in the domestic market, partly offset by decrease in exports due to unfavourable exchange rates and weaker volume demand.

Dairies PBIT decreased 5% mainly due to higher commodity prices, one-off inventory and asset write-off and unfavourable sales mix offset by improved operating efficiencies.

Printing and Publishing

Printing and Publishing revenue at \$352 million declined 3% from last year. This was largely due to weak print demand coupled with softer print prices and the closures of non-core businesses - library reference in USA and domestic education publishing in Malaysia. The decline was mitigated by higher export of education products, recovery in retail sales at airport bookstores arising from better merchandising mix and better performance from the digital printing business.

PBIT was 40% lower at \$5 million mainly due to decreased contribution from associated companies. This was partly offset by improvements from the underlying Printing and Publishing businesses over the corresponding period last year where the printing operations reversed from a loss to a profitable position due to tighter control of cost, improvement in margins from publishing operations and savings from discontinued businesses.

Others

The increase is mainly due to the recognition of a valuation gain on interest retained in a joint venture company following the demerger of FCL.

Tax

The Group effective tax rate ("ETR") of 26.9% (2013: 64.8%) is mainly due to non-deductible expenses and the high taxes imposed on the profits of subsidiaries operating in high tax countries. The write-back of over provision and the absence of one-off non-deductible expenses in the current financial year has resulted in a much improved ETR.

Balance Sheet as at 30 September 2014

The Group

The decrease in Reserves was mainly due to the distribution *in specie* of FCL, capital reduction, dividends paid and fair value adjustments on the investment in Vinamilk in Vietnam. This was partly offset by profits of \$147 million retained for the year.

The decrease in the various lines of Assets and Liabilities are mainly due to the completion of the FCL Distribution.

Setting aside the FCL Distribution, the increase in Other Investments is mainly due to the additional shares acquired in Vinamilk offset by the fair value adjustments while the increase in Properties Held for Sale is due to the recognition of a revaluation gain on interest retained in a joint venture company upon the FCL Distribution. The increase in Trade Receivables is driven by the increase in sales, especially in the Beverages and Dairies segment while the decrease in Other Receivables is mainly due to recoveries of accruals as at 30 September 2013.

The decrease in Borrowings is due to repayments made upon the completion of the FCL Distribution.

Group Cash Flow Statement – Financial Year Ended 30 September 2014

The cash inflows and outflows are detailed in the Group Cash Flow Statement.

Net cash inflow from operating activities of \$182 million as compared to an outflow of \$61 million last year due to higher income tax payments and higher development expenditure on properties incurred by FCL, which has since been demerged as explained in paragraph 8, page 14 of this report.

Net cash outflow from investing activities of \$1,558 million as compared to an inflow of \$5,761 million was mainly due to development expenditure incurred on investment properties under construction before the distribution *in specie* and the subsequent deconsolidation of FCL's cash balances upon the demerger of FCL. Last year's cashflow benefitted from the proceeds received from the disposal of APIPL Group, disposal of short term investments and redemption of units by an associated company.

Net cash outflow from financing activities of \$209 million was lower than the outflow of \$5,393 million last year mainly due to the cash payments made upon the capital reduction of \$607 million in April 2014 as compared to the capital reduction of \$4,728 million last year. The lower outflows was also contributed by the settlement of loans from FCL upon the demerger partly offset by settlement of the corresponding bank loans and borrowings.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

Countries which the Group operates in namely Singapore, Malaysia and rest of ASEAN are all expected to register stronger economic growth next year.

The Food & Beverage segment expects the lower prices of some of its key raw materials, despite remaining volatile, will help to relieve upward pressure on labour costs and lower regional revenue due to expected stronger Singapore dollar. In addition, consumer sentiment in the markets in which we operate is expected to be affected by both the economic climate and government policies. Nevertheless, the Group will continue to monitor the situation closely so as to respond in a timely manner to sustain the operating performance of the Group. The recent arbitration decision on the Group's shareholding of Myanmar Brewery Limited, in relation to which the Group is reviewing its options, may result in the sale of the Group's interest in its current brewery business in Myanmar.

While overall operating conditions for Printing and Publishing remain challenging, efforts to control operating costs are progressing well whilst initiatives to discontinue unprofitable businesses in past years have enabled reinvestment into growth areas.

11. If a decision regarding dividend has been made:-

(a) **Whether a final ordinary dividend has been recommended:** Yes

(d) **The date the dividend is payable.**

The Directors propose, subject to shareholders' approval at the Annual General Meeting to be held on 30 January 2015, a final dividend of 3.0 cents (last year: 12.0 cents) per share, to be paid on 16 February 2015. Taken with the interim dividend of 2.0 cents per share already paid, this will give a total distribution for the year of 5.0 cents per share (last year: 15.5 cents).

(e) **The date on which Registrable Transfers received by the Company (up to 5.00 p.m.) will be registered before entitlements to the dividend are determined.**

18. **SUBSEQUENT EVENTS**

On 31 October 2014, the Company announced that it had received the decision on its arbitration with Myanmar Economic Holdings Limited ("MEHL"). The Company had previously on 29 August 2013 and 10 September 2013 announced MEHL's intention to commence arbitration proceedings and subsequently, the receipt of notice of arbitration from MEHL, in relation to the Company's shares in Myanmar Brewery Limited ("MBL").

MEHL had sought to compel the Company to sell its 55% stake in MBL to MEHL at US\$246 million (approximately \$313 million) under the terms of the joint venture agreement between the parties.

The arbitral tribunal has ruled that MEHL's valuation of US\$246 million does not represent a fair value of the Company's stake in MBL and that the sale should take place at a price to be determined by an independent valuer.
