TREASURY HIGHLIGHTS

The Group aims to maintain a prudent financial structure to ensure that it will be able to access adequate capital at favourable terms. Our three businesses, namely Food & Beverage, Properties and Publishing & Printing, remain the main sources of cash flows generated for the Group. Management monitors the Group's cash flow position, debt maturity profile, cost of funds, interest rates exposures and overall liquidity position on a continuous basis. To ensure that the Group has adequate overall liquidity to finance its operations and investment requirements, the Group maintains a significant amount of available banking facilities with a large number of banks, and the Group's MTN Programs allows us continued access to the debt capital markets.

In FY2012, the Group's balance sheet strengthened further. Net Group Borrowings (net of cash) dropped from $2.4 billion to $2.2 billion during the year. Coupled with a 7.6% increase in total equity, to $8.25 billion, Group Net Gearing (borrowings less cash) fell to 26.7%. The reduced net borrowings was attributed to cash collection from the strong pipeline of pre-sold development projects in Singapore and overseas, stable cashflow generated from investment properties, sale of assets, as well as from the cash generative Food & Beverage business. The Group expects to receive more than $1.0 billion in cash from its existing pre-sold projects for the new financial year ending 30 September 2013. With the disposal F&N's interest in APB in November 2012, the Group cash would increase by S$5.6 billion in FY2013.

Interest cost in FY2012 was $166.6 million (of which $61.3 million was capitalised), 16.7% higher than the previous year's interest cost of $142.8 million (of which $71.2 million was capitalised) mainly due to higher borrowings and higher interest rates.

Source of Funding

Besides cash flow from our businesses, the Group also relies on the debt capital markets, equity market and bilateral banking facilities for its funding. As at 30 Sep 2012, the Group has $3.1 billion in banking facilities, $0.8 billion in Transferable Term Loan Facilities and S$3.9 billion in Medium Term Note Programmes to meet the funding requirements of the Group.

Available Bank Lines by Banks as at 30 Sep 2012

The Group maintains an active relationship with a network of more than 20 banks of various nationalities, located in various countries where the Group operates. Our five principal bankers are Bank of Tokyo-Mitsubishi UFJ, Ltd, DBS Bank Ltd, Overseas-Chinese Banking Corporation, Standard Chartered Bank and United Overseas Bank Limited.

The Group continues to adopt the philosophy of engaging the banks as our core business partners, which has served us well in the last financial turbulence. We continue to receive very strong support from our relationship banks across all segments of the Group's businesses. Total banking facilities (utilised and unutilised) extended to the Group as at 30 Sep 2012 amounted to $4.8 billion. The principal bankers of the Group provided 65% of these banking facilities. All banking relationships for the entire Group are maintained by Corporate Treasury in Singapore.

Interest Rate Profile And Derivatives

The Group manages its interest cost by maintaining a prudent mix of fixed and floating rate borrowings. On a portfolio basis, 51% of the Group's borrowings are in fixed rates (including floating rate borrowings that have been fixed with interest rate swaps). The term loans average tenor was 3 years as at 30 Sep 2012. The remaining 49% of the Group's borrowings are in floating rates as at 30 Sep 2012. The floating rate loan portfolio allows the Group to maintain a flexible maturity profile to support divestments and cash inflows from sales of development property where debt can be reduced quickly.

In managing the interest rate profile, the Group takes into account the interest rate outlook, expected cash flow generated from its business operations, holding period of long term investments and any acquisition and divestments plans.

The Group makes use of interest rates derivatives for the purpose of hedging interest rates risks and managing its portfolio of fixed and floating rate borrowings. The Group does not engage in trading in interest rates derivatives. The Group's total interest rate derivatives and the mark to market values as at 30 Sep 2012 are disclosed in the financial statement in Note 37.

Gearing And Interest Cover

The Group aims to keep the Group Net Gearing below 80%. As at 30 Sep 2012, this ratio was 26.7%. Total interest paid during the year amounted to $140.4 million, of which $61.3 million was capitalised as part of Properties Under Development. The net interest charged to profit statement for the year was $83.4 million and net interest cover was at 11.4 times. Net Borrowings over PBITDA was at 2.0 times.

Foreign Exchange Risks and Derivatives

The Group has exposure to foreign exchange risk as a result of transactions denominated in foreign currencies, arising from normal trading and investment activities. Where exposures are certain, it is the Group's policy to hedge these risks as they arise. For those exposures less certain in their timing and extent, it is the Group's policy to cover 50% to 90% of anticipated exposures for a maximum period of 12 months forward. The Group uses foreign currency forward exchange contracts and certain currency derivatives to manage these foreign exchange risks.

The Group does not engage in trading of foreign exchange and foreign exchange derivatives. The Group uses foreign exchange contracts and derivatives solely for hedging actual underlying foreign exchange requirements in accordance with hedging limits set by the Audit Committee and the Board under the Group Treasury Policy. These policies are reviewed regularly by the Audit and Executive Committees to ensure that the Group's policies and guidelines are in line with the Group's foreign exchange risk management objectives.

The Group's foreign exchange contracts and derivatives and the mark to market values as at 30 Sep 2012 are disclosed in the financial statement in Note 37.

The Group does not hedge its foreign exchange risks of its investments in overseas subsidiary, joint venture and associated companies. Such investments are long term in nature and therefore not feasible and economical to hedge. The Group only hedges the dividends cash flows payable from its overseas subsidiary, joint venture and associated companies.
