REVIEW OF PERFORMANCE

The principal activities of the Group are:

- (i) production and sale of beverages (includes soft drinks, beer and stout) and dairy products; and
- (ii) printing and publishing.

These activities are carried out through the Company's subsidiary, joint venture and associated companies to which the Company provides management and administrative services.

On 27 August 2013, the Directors announced the proposed demerger of its property business by effecting a distribution *in specie* (the "FCL Distribution") of all the ordinary shares in the issued share capital of Frasers Centrepoint Limited ("FCL"), a wholly owned subsidiary of the Company to shareholders of the Company, on the basis of two ordinary shares in FCL for each ordinary share of the Company and the listing of the FCL shares on the main Board of the Singapore Exchange Securities Trading Limited ("SGX-ST") by way of an Introduction.

On 13 November 2013, the shareholders of the Company approved the FCL Distribution. Prior to the quarter ended 31 December 2013, the Company subscribed for 1,806,520,790 new shares in FCL for a total subscription amount of \$670 million. Subsequently, the Company announced the completion of the FCL Distribution on 8 January 2014.

In accordance with FRS 105, Non-current Assets Held for Sale and Discontinued Operations, the results of FCL Group has been presented separately on the Group Profit Statement as Discontinued Operations. Accordingly, the Group's Properties Segment has been discontinued and the remaining undisposed Property components will be presented in the Others segment.

Profit Statement – 3rd Quarter

Group revenue increased 6% to \$622 million for the quarter ended 30 June 2014 compared to the corresponding period last year. Beverages recorded an increase on the back of Breweries' increased sales volume while Dairies recorded higher revenue contribution from its operations in Singapore, Malaysia and Thailand. Printing and Publishing revenue decreased 4% to \$84 million.

Group PBIT (profit before interest and tax) of \$79 million was 28% higher than the corresponding period last year, mainly due to higher contribution from Beverages and Printing and Publishing segments.

Group attributable profit on continuing operations* and basic earnings per share on continuing operations were 25% and 24% higher at \$45 million and 3.1 cents respectively.

* before fair value adjustment of investment properties and exceptional items

Beverages

Overall Beverages revenue and PBIT was 13% and 45% higher, compared to the corresponding period last year.

Soft Drinks revenue increased by 2% as compared to the same period last year. Sales revenue in Malaysia increased 2% on the back of increased sales volume due to increased trade presence and improved distribution points. The hotter weather also resulted in higher consumer off-take. PBIT increased by 2% mainly due to lower commodity costs and lower operating expenses.

Breweries revenue and sales volume were 41% and 37% higher than last year. Sales volume grew across most brands while sales revenue increased on the back of volume increases and lower promotional discounts but offset partly by unfavourable product mix and exchange movement. Breweries' PBIT increased by 74% mainly due to higher sales volume, lower discounts extended and timing of advertising and promotion spending.

Dairies

Dairies revenue was 3% higher than the corresponding period last year.

Dairies Thailand recorded revenue increase of 6% on the back of double digit growth in volume in both domestic and export markets. In the domestic market, marketing efforts on brand building with targeted consumer communication and awareness has seen consistent sales off-take. Strong performance in the export market is backed by stronger distributor performance. Dairies Malaysia recorded a 4% increase in sales revenue mainly due to an increase in sales volume, favourable sales mix and lower trade discounts offered. In addition, effective promotional and trade management efforts have significantly increased outlets penetration. Dairies Singapore recorded an increase of 7% in sales revenue due to improved sales in the domestic market, partly offset by export markets due to intense competition. Ice cream revenue decreased by 18% mainly as a result of closure of cart centers in Thailand, loss of contract packing orders and unfavourable exchange rate movement.

Dairies PBIT decreased 11% mainly due to higher commodity prices, one-off inventory write-off and unfavourable sales mix offset by the realisation of operational cost improvement initiatives.

Printing and Publishing

Despite higher sales recorded by printing operations in Singapore and China, printing and publishing revenue decreased by 4% to \$84 million. This was largely due to lower local demand for textbook sales in Singapore, softer print prices, falling distribution volume of magazines and the closures of loss making businesses - library reference in USA, domestic education publishing in Malaysia and export magazine distribution in Australia. The decline was however mitigated by stronger orders for education books from USA and higher local demand for English language books.

Profit before interest and taxation was \$2 million, an improvement over the corresponding period last year, mainly due to increased contribution from associated companies, better operating performance from the printing group due to tighter control of manufacturing cost and consistent profitability from publishing operations and cost savings from discontinued businesses.

Tax

The low Group effective tax rate of 13.8% (2013: 23.9%) is due to the write-back of prior year tax provision by both local and overseas subsidiaries. The higher Group effective rate of 23.9% in the same period last year was due to the under provision for tax in prior years by overseas subsidiaries.

Balance Sheet as at 30 June 2014

The Group

The decrease in Reserves was mainly due to the distribution *in specie* of FCL, capital reduction, dividends paid and fair value losses on the investment in Vinamilk in Vietnam. This was partly offset by profits of \$217 million retained for the period.

The decrease in the various lines of Assets and Liabilities are mainly due to the completion of the FCL Distribution.

Setting aside the FCL Distribution, the decrease in Other Investments is mainly due to the fair value losses on the investment in Vinamilk while the increase in Properties Held for Sale is due to the recognition of a revaluation gain on interest retained in a joint venture company upon the FCL Distribution. The increase in Trade Receivables is driven by the increase in sales, especially in the Beverages and Dairies segment while the decrease in Other Receivable is mainly due to recoveries of accruals as at 30 September 2013.

The decrease in Borrowings is due to repayments made upon the completion of the FCL Distribution.

Group Cash Flow Statement for quarter ended 30 June 2014

The cash inflows and outflows for the quarter ended 30 June 2014 are detailed in the Group Cash Flow Statement.

Net cash inflow from operating activities of \$97 million was lower than last year's \$149 million as last year had the benefit of cash contribution from FCL, which has since been demerged as explained in paragraph 8, page 18 of this report.

Net cash outflow from investing activities of \$12 million as compared to an inflow of \$117 million as last year's cashflow benefitted from the proceeds received from the redemption of units by an associated company.

Net cash outflow from financing activities of \$621 million was higher than the outflow of \$146 million last year mainly due to the cash payments made upon the capital reduction in April 2014.

Group Profit Statement – 9 Months-to-Date

Group revenue and PBIT increased 5% and 35% respectively over the corresponding period last year. The higher revenue and PBIT were mainly due to better performance from Beverages which recorded higher revenue and volumes, and from Dairies which recorded higher revenue as Thailand Dairies' sales and production recovered from the impact of massive flood last year. A gain on interest retained in a joint venture company also boosted PBIT. Group attributable profit on continuing operations* and basic earnings per share on continuing operations* were higher by 20% and 19% respectively.

*before fair value adjustment of investment properties and exceptional items

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

The global economy is expected to grow modestly in 2014 with the Singapore economy expected to grow at between 2% to 4%.

As global commodity prices are forecasted to remain volatile, it is expected to impact the key raw material costs in the Food & Beverage segment. In addition, consumer sentiments in the markets in which we operate will continue to be affected by the economic climate. Nevertheless, the Group will continue to monitor the situation closely to mitigate the effects of rising costs and to respond in a timely manner to sustain the operating performance of the Group.

Operating conditions for Printing and Publishing remain challenging but efforts to control operating costs are progressing well whilst initiatives to discontinue unprofitable businesses in past years have enabled reinvestment into growth areas.

No dividend has been declared for the current financial period.
