

Capital Resources

The Group aims to maintain a prudent financial structure to ensure that it will be able to access adequate capital at favourable terms. The Group's core businesses, Food & Beverage ("F&B") and Publishing & Printing ("P&P"), are its main sources of cash flows.

Management monitors the Group's cash flow position, debt maturity profile, cost of funds, interest rate exposures and overall liquidity position on a continual basis. To ensure that the Group has adequate overall liquidity to finance its operations and investments, the Group maintains a significant amount of available banking facilities with many banks. The Group's Debt Issuance Programmes also provide F&N continued access to the debt capital markets.

As at 30 Sep 2019, the Group's borrowings, net of cash, increased to \$409.4m, from \$341.3m a year ago. The increased borrowings were taken on mainly to finance the Group's investment in Starbucks Coffee (Thailand) during the financial year. Consequently, the Group's net gearing increased to 0.14 times of shareholders' funds. Cash generative businesses, ample funding sources and significant debt headroom continue to put F&N in a strong position to tap further growth opportunities.

Interest cost in FY2019 was \$21.7m, lower than the previous year's interest cost of \$30.5m.

SOURCE OF FUNDING

Besides cash flow from its businesses, the Group also relies on the debt capital markets, the equity market and bilateral banking facilities for its funding. INTEREST RATE PROFILE AND DERIVATIVES

The Group manages its interest cost by maintaining a mix of fixed and floating rate borrowings. On a portfolio basis, 96.38% of the Group's borrowings are in fixed rates with an average fixed rate tenor of 4.0 years as at 30 Sep 2019. The fixed rate borrowings consist largely of the fixed rate notes issued under F&N Treasury Pte Ltd's Debt Issuance Programme and bilateral bank term loans that have been hedged with interest rate swaps. The remaining 3.62% of the Group's borrowings are in floating rates as at 30 Sep 2019.

In managing the interest rate profile, the Group considers the interest rate outlook, expected cash flow generated from its business operations, holding period of long-term investments and any acquisition and divestment plans.

The Group makes use of interest rate derivatives for the purpose of hedging interest rate risks and managing its portfolio of fixed and floating rate

borrowings from time to time. The Group does not engage in trading of interest rate derivatives. The Group's total interest rate derivatives and the mark to market values as at 30 Sep 2019 are disclosed in the financial statement in Note 34.

For those exposures that are less certain in their timing and extent, it is the Group's policy to cover 50% to 90% of anticipated exposures for a maximum period of 12 months forward. The Group uses foreign exchange forward contracts and certain currency derivatives to manage these foreign currency risks.
